

# MILL CHAIN SPROCKET

**Custom Plastic Fabrication & Distribution**

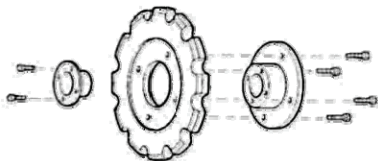

Mill Chain sprockets are offered in your choice of UHMW, Polyurethane, or Nylon. They provide impact and corrosion resistance while at the same time they protect your chain and reduce operating noise. UHMW idler sprockets require no lubrication. Polyurethane and Nylon sprockets are provided with grease zirks. Our drive sprockets include a bolt on steel hub plate and are offered in your preferred taper lock style, or in a strait bore. Listed below are some of our standard sizes.

**Call us for your custom requirements.**
